

CLAIM LISTING

1. (Currently Amended) A polytunnel system comprising a series of leg members, a plurality of cover support members, and a cover, each leg member carrying a bracket which, in turn, carries an associated one of the cover support members, such that each cover support member is secured to the associated leg member by the associated bracket, each bracket further having a movable rope anchorage point provided thereon, a rope being secured to and extending between each movable rope anchorage point, the rope stretching over the cover to secure the cover in position, wherein each bracket is securable to the associated leg member in a range of positions so as to allow the height at which the cover support member is secured to the associated leg member by the bracket to be adjustable with the cover in situ, and to simultaneously adjust the vertical position of the associated movable rope anchorage point.
2. (Canceled)
3. (Previously Presented) A system according to Claim 1, wherein each bracket defines a passage through which the associated leg member extends.
4. (Original) A system according to Claim 3, wherein the bracket defines an opening and the associated leg member is provided with a series of openings, a fixing pin being locatable within the opening of the bracket and selected one of the openings of the leg

member to secure the bracket in a selected position.

5. (Previously Presented) A system according to Claim 1, wherein each bracket includes at least one arm onto or over which part of an associated cover support member can be located.

6. (Previously Presented) A system according to Claim 1, wherein each bracket includes at least one socket arranged to receive an end part of an associated cover support member.

7. (Previously Presented) A system according to Claim 1, wherein the ends of the cover support members extend generally vertically.

8. (Canceled)

9. (Canceled)
